SUMMARY

A seven-year study was conducted of the thermo-mechanical and thermal behavior of high-temperature structural materials, described in detail in earlier technical interim and end-of-the-fiscal-year letter reports, listed in the following pages. This bibliography.

This research project has resulted in a total of eighty-five (85) technical publications in the engineering and scientific literature involving a total of fifty-three (53) different co-authors. ⁷⁵ *Keywords:*

Martens; Thermal Stress; Thermal Conductivity;
Thermal Diffusion.
